

VOLUNTEERS NEEDED FOR RESEARCH STUDY

Reducing Reinjury Anxiety in Athletes: The Use of Gratitude

IRB#2022-336

- The Department of Kinesiology at Fort Worth campus of Texas Christian University is conducting research to investigate the effects of gratitude on reinjury anxiety.
- This particular study is examining the effects of a one-time, online gratitude intervention on injured athletes.
- We are currently recruiting injured athletes (18+ Years Old).
- Athletes will complete a one-time, online gratitude intervention via Qualtrics.
- Participation will take place anywhere of the participant's choosing. There are no risks involved in this research.
- We don't believe there are any risks from participating in this research that are different from risk that you encounter in everyday life. The researchers will take all precautions to maintain privacy of digital information, however, there is always the potential risk for the information to be compromised.
