

DISCOVER

TCU NURSING

July 13-17, 2020

...New this year...

RESIDENTIAL CAMP

Discover what Nursing is really like.

Like many people, high school students often have limited experiences with the actual role of a professional nurse.

Through **Discover TCU Nursing** you will have the opportunity to participate in activities that professional registered nurses do every day. You'll experience the importance of teamwork and excellent communication in promoting health, explore thinking and hands-on skills nurses need to care for patients, and use those skills in simulated health care situations.

This **TCU Nursing** camp is designed to give high school students a first-hand look at the nursing profession, its rewards, challenges and opportunities.

- ❖ Learn from TCU Nursing faculty and students
- ❖ Practice effective communication skills
- ❖ Explore nursing skills such as assessing patients, caring for wounds, taking vital signs, and using medical terminology
- ❖ Experience how nurses use knowledge of anatomy and physiology, math, and systems to care for patients
- ❖ Interact with human patient simulators
- ❖ Visit a local hospital
- ❖ Complete an American Heart Association CPR course
- ❖ Gain insight into TCU and the TCU Baccalaureate Nursing Program
